

PD Neurotechnology Ltd

Information Security and Privacy Policy

PD Neurotechnology Ltd is steadily strengthening its position and reputation while effectively responding to challenges in the demanding field of Information Security and Privacy.

Based on its experience and expertise, the company aims to continuously expand its Information Security and Privacy services, delivered by experienced and skilled personnel, with a consistent focus on quality, safety, and the full satisfaction of the needs and requirements of all interested parties.

PD Neurotechnology Ltd has implemented an Information Security and Privacy Management System in accordance with ISO/IEC 27001:2022, extended by ISO/IEC 27701:2019, and is committed to the following:

1. Satisfying the needs and requirements of interested parties by delivering secure, safe, and high-quality products and services.
2. Ensuring the confidentiality, integrity, and availability of information processed, handled, or maintained, whether electronically or physically, by the company's personnel and information systems.
3. Empowering data subjects to make informed decisions about who can process their personal data and for what purposes, in accordance with the company's activities.
4. Ensuring the timely identification and prompt response to emergencies involving actual or suspected breaches of the company's information security and privacy.
5. Protecting the company's investment in information and communications technologies by ensuring their security, reliability, and proper use.
6. Ensuring compliance with Greek and European legislation regarding personal data and privacy management, communications, and copyright.
7. Continuously improving the Information Security and Privacy Management System to enhance its effectiveness in ensuring the confidentiality, integrity, availability of information, and the protection of personal data for the benefit of the company, its employees, partners, and all other interested parties.

It is important for PD Neurotechnology Ltd to allocate the necessary resources to support its Information Security and Privacy Management System and to equip information security personnel with the knowledge needed to fully utilize their skills and capabilities.

The company fully recognizes the objectives of the Information Security and Privacy Management System and supports their implementation.

The Director

Nikolaos Moschos
