## A new version of the PDMonitor® Physician Tool is online

**May 21, 2021:** PD Neurotechnology® presents a new version of the PD Monitor® Physician Tool. Physician Tool is a web-based application used by the Physicians to view and download patient reports with a comprehensive and objective assessment of the disease symptoms. It serves as a patient management tool, while at the same time it stores patient data for 10 years, as an Electronic Patient Record. The new released Version 1.3.0 brings several important improvements to the PDMonitor® Physician Tool.

Among others, the new features include:

- An improved, more user friendly, patient Overview page
- Easy and direct access to all the unread reports from the initial home page
- Easier medication changes monitoring
- More options in the PDMonitor® Report and better graphics
- The Physician can create and handle a Patient account totally from the Physician tool
- Added and visible help messages throughout the Physician Tool
- Improved overall responsiveness
